

i-FAB 2023, 8th international congress of Foot and Ankle Biomechanics

Start Date: 19/04/2023 00:00

End Date: 22/04/2023 23:59

The 8th i-FAB congress will be taking place. Hopefully as a face to face (complete physical meeting) at which the whole International Foot and Ankle Biomechanics community can finally meet, socialise, share science and create networks again. However, due to the present situation and uncertainty over its development the organising committee and i-FAB board are planning on different scenarios. Perhaps, the most likely is a phygital congress: physical manifestation that follows the guidelines of the moment and digital.

In any case, i-FAB France 2023 will be an international meeting with high scientific quality. We are looking forward to receiving you for participation at i-FAB2023.

Best regards Marc and Eric

Dr Marc Janin, i-FAB2023 Conference Chair.
