

# i-FAB 2023, 8th international congress of Foot and Ankle Biomechanics

The poster for the i-FAB 2023 Workshop 3D Planning is titled "19 april 2023 : A DAY FOR FOOT & ANKLE 3D EXPERIMENTATION". It features the i-FAB logo and the text "International Foot Ankle Biomechanics - Palais des congrès - Bordeaux". The main content includes the text "Today uses of 3D Models/ clinical cases with true 3D Model" and a quote: "« You can present a complex case with possibilities to planify on your model »". A flow diagram shows the process: "Presentation slides GB + CT Scan or cone beam in charge Dicom data" leads to "toullec.eric33@icloud.com", which leads to "Expert comitee 9 selected cases", which finally leads to "Clinical case Presentation & Planning on your 3D Model". The registration information at the bottom is "Registration on [www.iFab2023.com](http://www.iFab2023.com) : Workshops only or normal »".

**Start Date: 19/04/2023 00:00**

**End Date: 22/04/2023 23:59**

The 8th i-FAB congress will be taking place. Hopefully as a face to face (complete physical meeting) at which the whole International Foot and Ankle Biomechanics community can finally meet, socialise, share science and create networks again. However, due to the present situation and uncertainty over its development the organising committee and i-FAB board are planning on different scenarios. Perhaps, the most likely is a phygital congress: physical manifestation that follows the guidelines of the moment and digital.

In any case, i-FAB France 2023 will be an international meeting with high scientific quality. We are looking forward to receiving you for participation at i-FAB2023.

Best regards Marc and Eric

Dr Marc Janin, i-FAB2023 Conference Chair.

Dr Eric Toullec, Dr Marc Janin Co Chair i-FAB2023 Program Committee
