

# AFCP - Spring Days

**Start Date: 11/05/2023**

**End Date: 13/05/2023**

Hello I am Barbara Piclet, President of the AFCP, French Association of Foot Surgeons, I invite you to our Spring Days from May 11 to 13, 2023 in Strasbourg. Paper submissions are open until March 31.

This congress also welcomes non-exclusive foot and ankle surgeons, interns, physiotherapists and podiatrists for « duos » with surgeons. AFCP is a very dynamic company. Its mission is sharing, youth and conviviality. At the top of the bill, we offer you a maxi Battle on ankle ligamentoplasty with 3 experts who will discuss their technique (frondiforme, hemi-Castaing and anatomical reconstruction under arthroscopy).

The forefoot will not be left out with a session on cuneo-metatarsal instability of the first ray, a focus on interphalangeal implants in the management of toe deformities and a round table on the failures and complications of forefoot surgery.

Three practical sessions about bi-malleolar fracture, cavus foot and DMMO with the MIFAS and a session of clinical files from the Facebook France foot surgery page will complete the program. The classic session of the AFCP Youth Office will be dedicated to flatfoot deformity. Like our city of Strasbourg, which is geographically and literally at a crossroads (Strasse in Alsatian meaning road), the theme of this congress will be the opening: to foreign companies, Belgium being our guest this year.

We are expecting many of you for this moment of sharing and friendship with Frédéric Leiber, our president of this AFCP dynamic congress.
